

Pausa AI: relatorio completo de desenvolvimento do app

Documento consolidado sobre codigo, stack, arquitetura, front-end, back-end, banco de dados, mobile, artes, direcao visual, conteudo, videos, scripts, validacao e biblias de produto do workspace local.

Escopo do relatorio

O PDF inventaria os arquivos proprios do projeto e resume as decisoes tecnicas e editoriais ja materializadas no repositorio. Dependencias de terceiros, cache de build, ``.git``, ``.next``, ``.node_modules`` e builds Android gerados foram excluidos do inventario principal para preservar legibilidade e evitar confundir codigo do produto com artefatos externos.

MP4 REAIS

Leitura rapida

- Produto mobile-first de bem-estar preventivo, com check-ins, recomendacoes, rotina, movimento leve, agenda, historico e camadas B2B/admin.
- Stack principal: Next.js 16, React 19, TypeScript, Tailwind, Prisma, SQLite local, JWT em cookie httpOnly e Expo/WebView no companion mobile.
- Direcao de arte: calma, clara, humana, sem estetica fitness agressiva; paleta navy, mint, lavender, ice e acentos positivos.
- Conteudo planejado de videos: banco atual tem registros ``.InstructionalVideo`` para exercicios, missoes, praticas de Yoga e sequencias de Yoga.

Identidade, promessa e limites do Pausa AI

O Pausa AI é um MVP full-stack de bem-estar preventivo. A promessa central não é diagnosticar, tratar ou substituir ajuda humana; é oferecer pequenas pausas possíveis para reduzir sobrecarga, recuperar clareza e criar continuidade no dia.

Pilares de produto

- Check-in rápido para mapear foco, humor, estresse, energia e sono.
- Recomendação local com IA opcional e fallback seguro por regras.
- Conteúdo leve: respiração, pausa sem tela, escrita, sono, Yoga, mobilidade, alongamentos e caminhada.
- Progresso gratuito por XP, níveis, histórico e conquistas.
- Rotina e agenda assistidas sem prometer automações que o sistema operacional não permite.

Tom e segurança

- Linguagem breve, clara, humana e sem cobrança.
- Evitar promessas de cura, diagnósticos, performance e frases agressivas.
- Quando houver risco, interromper recomendações comuns e orientar apoio imediato.
- Em contexto corporativo, dados devem ser anônimos e consolidados.
- O modo sem redes é assistido: salva intenção, lembra e orienta configurações do aparelho.

Frases e postura editorial

O app fala em termos de "parece", "pode ser útil", "vamos começar pequeno", "uma pausa possível" e "sem tentar resolver tudo de uma vez". O usuário não deve sentir que falhou se não completar uma prática; o app reconhece pequenos passos e adapta amplitude, ritmo e contexto.

Públicos e casos de uso

O núcleo B2C atende pessoas com sobrecarga cotidiana, foco fragmentado, uso excessivo de telas, energia baixa, sono sensível e necessidade de movimento leve. A camada B2B serve pilotos corporativos com dashboard demonstrativo, leads e relatórios consolidados.

Stack, runtime e organizacao do projeto

Item	Detalhe
Workspace	C:/Users/rodrigo.filho/Documents/Pausa AI
Web	Next.js 16 App Router, React 19, TypeScript
Estilo	Tailwind CSS, globals.css e tokens em tailwind.config.ts
Banco local	SQLite via Prisma ORM
Autenticacao	JWT assinado em cookie httpOnly + bcryptjs
Validacao	Zod em rotas e formularios criticos
Graficos/UI	Recharts e lucide-react
IA	OpenAI opcional via OPENAI_API_KEY; fallback local por regras
Mobile	Expo + React Native + WebView + bridge nativa para feedback/permissoes
PDF	@react-pdf/renderer para documentos gerados localmente

Dependencias web

@prisma/client, @react-pdf/renderer, bcryptjs, date-fns, jose, lucide-react, next, openai, react, react-dom, recharts, resend, zod

Dependencias mobile

expo, expo-calendar, expo-haptics, expo-intent-launcher, expo-notifications, react, react-native, react-native-health-connect, react-native-webview

Estrutura de pastas

- `app/`: telas, layouts e APIs Next.js.
 - `components/`: UI reutilizavel e experiencias client-side.
 - `lib/`: regras de negocio, seeds, recomendacao, agenda, walking, videos e conteudo.
 - `prisma/`: schema, seed e SQLs de migracao.
- `mobile/`: app Expo/WebView e ponte nativa.
 - `public/`: artes, videos, frames, walking, yoga, APKs e manifests.
 - `scripts/`: geradores de assets, videos, PDFs, testes e validadores.
 - `docs/`: documentacao, handoff, roadmaps, roteiros e relatorios.

CSS/Tailwind	1
Prisma schema	1

Rotas, telas e componentes

O front-end usa Next.js App Router com rotas publicas, area autenticada em `/app`, admin/B2B e experiencias mobile-first. A navegacao principal prioriza dashboard, check-in, missoes, movimento, rotina, agenda, historico e perfil.

Rotas de pagina principais

APIs, servicos e regras de negocio

O back-end vive no App Router (``app/api``) e em modulos de dominio dentro de ``lib/``. A maior parte das decisoes sensiveis de produto, como risco, recomendacao, agenda e conteudo guiado, possui fallback local para nao depender exclusivamente de servicos externos.

Regras de alto risco

- Risco textual deve sobrepor recomendacoes comuns e orientar ajuda imediata.
- IA e opcional; fallback local deve continuar funcionando sem `OPENAI\_API\_KEY`.
- Dados B2B devem ser consolidados; nunca exibir respostas individuais no dashboard empresarial.
- Videos planejados nao significam MP4 final; a UI deve manter fallback honesto quando arquivo nao existe.

Prisma, SQLite e conteudo semeado

O banco local e SQLite (`file:./dev.db`) controlado por Prisma. O schema tem 40modelos e cobre usuarios, perfis, check-ins, missoes, exercicios, videos planejados, rotina, agenda, walking, saude, empresas, leads e progresso.

Modelo	Campos	Indexes	Uniques	Registros

Taxonomia de movimento

Corpo & Movimento combina Yoga de bolso, mobilidade, alongamentos, caminhada, casa leve, pausas de trabalho, cardio leve e funcional com foco em seguranca, baixa pressao e progressao.

Direcao de arte, assets e videos

A direcao visual e calma, limpa, humana e preventiva. O app evita academia escura, neon, linguagem de performance e personagens simplificados quando a entrega pede acabamento final. A paleta tecnica vem de `tailwind.config.ts` e `globals.css`.

Item	Detalhe
Navy	#172554
Mint	#A7F3D0
Lavender	#DDD6FE
Ice	#F8FAFC
Text	#334155
Line	#E2E8F0
Positive	#10B981
Amber	#F59E0B
Fonte UI	Inter/system-ui no CSS global

Politica visual

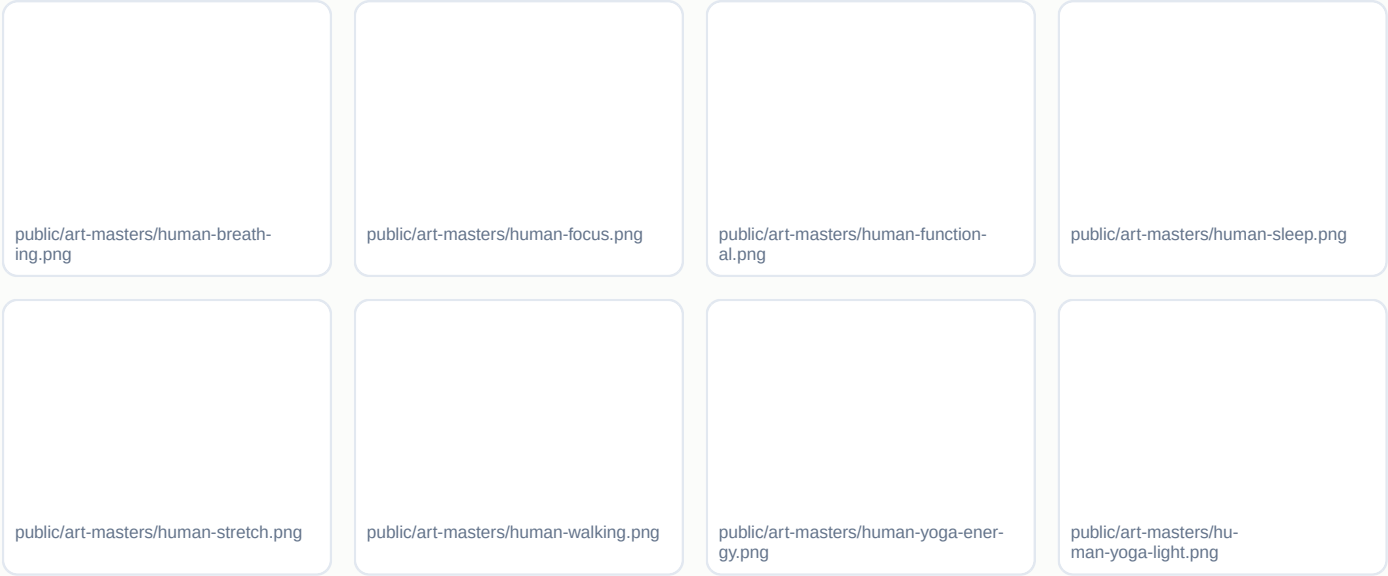

- Usar ambientes claros, casa/trabalho, luz natural, plantas, tapete discreto e composicao limpa.
- Priorizar pessoa adulta recorrente, expressao calma, roupa azul-marinho e visual semi-realista/premium.
- Em movimento, mostrar alinhamento seguro e amplitude confortavel, sem acrobacia ou estetica fitness agressiva.
- Em videos, manter formato principal 9:16, legenda, narrativa gentil e checklist de aprovacao antes de publicar.

Inventario de assets publicos

Este inventario agrupa todos os arquivos servidos em `public/`, incluindo artes, APKs, videos, thumbnails, frames e manifests.

Masters humanos e amostras visuais

Sprint de videos em manifest

Item	Detalhe
Manifesto de producao	public/videos/video-manifest.json
Total no manifesto	138
Corpo & Movimento no manifesto	116
Missoes classicas no manifesto	22
Status	roteiros_metadados_thumbnails_prontos__mp4_final_pendente
Observacao	O banco atual amplia InstructionalVideo para YogaPractice/YogaSequence; o manifesto de producao ainda descreve a sprint original de 138 videos.

Expo/WebView, APKs, scripts e validacao

Mobile companion

O app mobile em `mobile/` usa Expo, React Native e WebView para carregar a experiencia web. A ponte `mobile/nativeFeedback.ts` tenta habilitar haptics, notificacoes, calendario, intents Android, Health Connect e atalhos de configuracao quando o ambiente nativo permite.

Validacao recomendada

- `npm.cmd run db:push`, `npm.cmd run db:seed`, `npm.cmd run typecheck`, `npm.cmd run build` e `npm.cmd run test:smoke`.
- Em Windows, se Prisma travar em `query\_engine-windows.dll.node`, parar processos Node/Next antes de gerar client.
- Para testar no celular, iniciar servidor em `0.0.0.0:3000` e usar o IP LAN atual, nao o IP antigo no nome do APK.

Biblioteca interna e fontes de verdade

A pasta `docs/` contem roadmaps, relatorios, handoffs, roteiros de video, direcao de voz, planejamento de imagens, checklist mobile e PDFs. O handoff de continuidade e este novo relatorio devem ser lidos junto com README, schema Prisma e os dados reais do seed.

Pendencias, riscos e proximos passos

Limites conhecidos

- SQLite e adequado para desenvolvimento local; producao publica deve migrar para PostgreSQL ou banco gerenciado.
- Web Push real exige HTTPS, service worker de producao e configuracao de dominio.
- Alarmes nativos e bloqueio de redes dependem das permissoes do Android/iOS; o produto deve comunicar limites com honestidade.
- Health Connect precisa de validacao em aparelho fisico e permissoes reais.
- Videos planejados precisam de MP4 H.264 final, audio, legenda, thumbnail e checklist antes de publicacao.

Proximas fases recomendadas

- QA completo no celular fisico, cobrindo login, onboarding, check-in, rotina, Yoga, caminhada e agenda.
- Staging HTTPS para WebView e testes externos.
- Revisao LGPD formal, politicas de retencao e privacidade para B2B.
- Dashboard B2B real atras de feature flag, mantendo demo anonima como experiencia segura.
- Ampliar testes automatizados para APIs criticas, agenda, videos planejados e recomendacao.
